

CATIA Customization course (1 day): Become more efficient within your own CATIA environment.

Introduction:

This course will give you a flying start with CATIA. It's perfect for beginners and CAD-Engineers who are looking to quickly become efficient in the CATIA environment. You'll get an introduction to Catia System Customization and you will learn how to create your own workbench containing all your most frequently used tools.

After only one day, you will be able to improve your efficiency using shortcuts and enhance the visualization quality to fit your needs.

Day 1

Morning (9:00-12:00): CATIA Customization – Introduction to the Catia Environment (quick customization and useful shortcuts); CATIA Customization – Settings (set up the screen interface for each workbenches).

Afternoon (13:00-17:00): CATIA Customization – Settings (customize CATIA and set the preferences); CATIA Customization – Master Workbench (create your own workbench that contains most important features of GSD and Part Design, plus other features)
